## Crammix Bricks - Its Roots in Clay

Crammix is built on a foundation of sound economic, environmental and social principles in the interest of sustainable development.

As one of the largest and most technologically advanced clay brick manufacturers in the Western Cape, we are committed to the supply of environmentally friendly products, while also safeguarding the environment.

We thrive on a legacy of innovation - to design, manufacture and supply clay brick products that add 'quality of life' to all those who occupy buildings.

To meet the design needs of modern-day construction, we also have a dedicated manufacturing facility to produce special-shaped clay bricks.

All Crammix clay face, plaster bricks, pavers and special shaped products are manufactured to exacting international quality standards and technical specifications, ensuring peace of mind and a lifetime of comfort, beauty and environmental protection.

*\* Due to individual hand made shapes, the SABS Standards do not apply to the cobbles.*

### CRAMMIX FRAMEWORK OF SUSTAINABILITY

At Crammix we talk about quality. Not only about the quality of our clay face, plaster bricks, pavers and wine cooling products, but also about the inherent qualities that form part of our economic, environmental and social commitment to sustainable development .
