From a simple wine rack to a complete cellar, the Crammix wine cooler has been designed as a flexible and energy-efficient wine storage system. Made from natural kiln-fired clay, these Teracotta wine racks have thermal insulation properties, which means that they will keep your wines naturally cool and insulated, at just the right temperatures. Featuring the same high-performance characteristics of a Crammix Clay Brick, these wine coolers will always perform to their optimum, and never decay or deteriorate. For the serious wine collector who needs to optimise on space, these twin hexagonal racks can be easily stacked into free-standing units or built into a specific space or cellar wall
